

Oyewo Oluwaseyitan Marvelous

Frontend Developer
28104880450| oluwaseyitan299@gmail.com

PROFESSIONAL SUMMARY

I am a highly skilled and results-oriented Frontend Developer with a proven track record of creating high-quality, user-friendly web applications. With expertise in modern frontend technologies like React.js, TypeScript, and Next.js, I have successfully contributed to developing innovative solutions for several tech companies. I excel in translating UI/UX designs into interactive, responsive web pages, ensuring optimal performance across devices. Passionate about driving web innovation and building community-driven technology, I thrive in dynamic, fast-paced environments.

TECHNOLOGIES

Front End	React.js, Next.js, Tanstack Router, Tanstack Query, Zustand, Redux, JavaScript, TypeScript, Tailwind, Shadcn UI, Material-UI, GraphQL, Chakra UI, Framer Motion, Redux Toolkit.
Back End	NodeJs, ExpressJs, Typescript

EXPERIENCE

Frontend Software Engineer| 5ireChain 2022 – 2024

5ire is a fifth generation blockchain company bringing a paradigm shift from a for-profit to a for-benefit economy.

As a key member of the core tech team at 5irechain, I drove the development of high-performance front-end applications, ensuring seamless cross-platform optimization for mobile devices. I specialized in transforming UI/UX mockups into responsive, interactive web pages while balancing technical and user-centric requirements. I stayed at the forefront of web development trends, continuously refining my skills in programming languages and web technologies.

Notably, I contributed to the development of several key platforms:

- [5ireScan](#)
- [Validator App](#)
- [Nominator App](#)

- Technologies: Typescript, React.js, web3.js, Styled-components, Redux, Git, Github

As a front-end developer at Livrite Healthcare Services, a leading health tech company, I play a pivotal role in designing and building seamless, high-performance applications. My responsibilities include ensuring cross-platform optimization for mobile devices, translating UI/UX mockups into responsive and interactive web pages, and integrating REST API endpoints from the backend. I also implement comprehensive software testing for each feature, ensuring the highest quality standards. I collaborate closely with both technical teams and end-users to address consumer needs while staying ahead of trends in web development and programming languages. Additionally, I contribute to the strategic direction of our tech architecture, shaping the future of our platform.

Technologies: TypeScript, JavaScript, React.js, Next.js, Material-UI, Redux, Git, GitHub

Working with Product Designers, Product Owners, & Software engineers to deliver the best and quality products for clients.

- Responsible for maintaining and developing Frontend web applications using React and Redux
- Responsible for converting UI/UX Mockups to responsive and interactive web pages.
- Responsible for consuming REST API endpoints.
- Technologies: JavaScript, ReactJs, Redux, GraphQL, ContextApi, Git, Github

PROJECTS

Noble-clothing

- An e-commerce platform
- Built with ReactJs, and Styled-components, and firebase

Github(frontend):<https://github.com/seymarv/noble-clothing/>

Online: <https://noble-clot.netlify.app/>

Ifumsa Website

- A website for obafemi awolowo university medicine department
- Built with ReactJs, and Styled-components

Github(frontend):<https://github.com/seymarv/ifumsa-website>

Online: <https://www.ifumsa.org/>

PORTFOLIO WEBSITE

- My portfolio website containing details about me, some of my projects and my experience
- Built with HTML5 and SCSS

Github(frontend):<https://github.com/seymarv/Portfolio>

Online: <http://seymarv.netlify.app/>

MARVIE-NOTES

- Marvie-Notes is a web note application that allows users to create their own profile and start writing, editing, deleting and liking notes, users can decide to make their notes either private and public.
- Developed Frontend using Javascript, ReactJs, HTML5, Bootstrap, SCSS, Redux
- Developed Backend using JavaScript, NodeJs and ExpressJs

Github(frontend):<https://github.com/seymarv/marvNotes>

Github(backend):<https://github.com/seymarv/marvNotes-backend->

Online: <http://marvienotes.herokuapp.com/>

BOOK-SHOP

- This web application mimics the features of a Book-shop, where users can sign up as admin and put books on sale, users can also go through a list of books on sale and place an order.
- Developed using Javascript, NodeJs, ExpressJs, and EJS as the templating engine

Github: <https://github.com/seymarv/BookshoppingCart>

Online: <http://book-shop-marvy.herokuapp.com/>

MOVIE-NOMINATION

- This is a web application where users get a list of movies and can nominate up to 5 favorites from the list, the users get a badge when they nominate 5 movies as their favorites.
- Developed Frontend using ReactJs, SCSS and IMDB Api

Online: <https://shopify-nominations-project.herokuapp.com/>
